THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U.S.C., 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. KTB-20, situated in the buildings of the Sachsenwerk, Niedersiedlitz, was placed under the control of SAG "Kabel", Radeberg (formerly also Sachsenwerk) on 1 December 1949. The Bureau will continue to develop fractional hp electric motors (8-400 Watt) for manufacture by the Radeberg factory. All employees have been retained.
2. The Radeberg factory is also constructing decimeter apparatus. These operate on 22 cm, and have output power of eight watts. Operational tests are being carried out between Hellerau (Dresden) and Lichtenberg (Berlin) with three intermediate relay stations. The Russians have asked for the circuit to be reorganized with five intermediate relay stations, four of which will be at Müggelsee (Berlin), Golm (Mark), Collm (E 63), and Falkenberg.
3. The Berlin Bureau for Electrical Machines, known as the B.E.M., has been placed under the control of the Sachsenwerk, Niedersiedlitz, and will design small to medium size electric motors for manufacture there.
